The Royal Rooms, near C. P. R. station, main street, Vulcan, Rates 75c and \$1.

We have some good houses splendidly located for sale. Flood, Whitcher & Elves.

There will be no services in St. Aldhelm's Church this coming Sunday, October 14th.

Born, at Mrs. E. Speer's private hospital on October 26th, to Mr. and Mrs. J. D. Eamor, a son.

Preparations are being made for anniversary services in connection with the United Church, which are to be held the latter part of this month.

The many changes and improvements made by Mr. Daines in his place of business has prompted the change of name to "Vulcan Shoe Store".

For the first time in the history of St. Aldhelm's a radio was installed through the kindness of D. C. Jones, on Sunday, October 7th, to hear the broadcast service from the Calgary Arena from which Mr. Justice Walsh and Bishop Sherman spoke on the Anniversary appeal. The service was enjoyed greatly by all who were able to attend.

The latest boxing news is that Young Cowie and Frankie Jackson have again been matched for the lightweight championship of Western Canada. This bout will be one of twelve rounds and will be welcomed by the fans. Both boys have the support of the local enthusiasts for their gameness and the clean sporting traits shown in the last engagement. Roy Kubik and Fred MacIntosh, both of Lomond, will provide the semi-windup. These boys are keen to go and confident of winning and Lomond and district fans are anxious to see their supremacy tested. Stewart Speechley will be given another chance, this time against Young Edwards of Winnipeg. Both boys are nice boxers, just out of the amateur ranks. In addition the Promoters hope to have Alf Fairclough (the British harvester) in an exhibition bout with a local boy. If the weather holds good the promoters expect to put on a few more cards in the Rink as Lew Kesler, Provo, Dave Perry of Winnipeg, Kid Lee of Yorkton, and many others are anxious for a chance in Vulcan.

LOCAL NEWS ITEMS

On Monday, October 15th, between the hours of 2:30 and 3:30 p.m., Mrs. Collier and Mrs. Dodds, N. G. and V. G. respectively of Clover Leaf Rebekeh Lodge will arrive with Mrs. Smith, D.D., at the latter's residence, when Mrs. Marie Neilson, Rebekeh Assembly President, will be the honored guest. All members of the Rebekeh Branch of the Order are cordially invited to take this opportunity of personally meeting Mrs. Neilson.

Rev. J. N. Brunton will take for his subject in the United Church, Sunday morning, "Lessons from the little pot of oil," and in the evening, "Lessons from the life of the farmer." Music will be rendered by the junior choir in the morning and the senior choir in the evening. Everybody welcome. Service at Mayview at 2 and Red Cross at 3:30.

Vulcan Women's Institute met on Thursday last, one day previous to the regular meeting day, on account of the school fair. Opening was in regular form, and "the worst fright I ever got" was splendidly given in answer to roll call. Reports of the rest room committee and visiting committee were presented. Mrs. C. L. Rich and Mrs. Sheffield were appointed a committee for three months. Mrs. Monkman presented a paper on "Home Economics." It was decided to hold an Armistice tea and sale of home cooking on November 10th. The program included group singing, and dainty lunch was served by Mrs. Mc Mann, Mrs. Dickinson and Mrs. Clark.

Mr. W. G. Bishop of Greenville, Ohio, dropped in at The Advocate office to bring greetings from across the line, and to cheer us with a couple of good American bills, paid in advance on subscription account. Residing in Ohio and farming in Alberta brings Mr. Bishop to Vulcan occasionally, and in the meantime he keeps tab on the dry and wet and cold and hot of the Vulcan district through the medium of this community journal. He is always a cheerful caller, and a game Alberta farmer.

It rained just a little on Tuesday and there was considerable snow and storm on Wednesday, creating the first break in the exceptionally fine period of weather since the shower of last summer. It has been a most remarkable fall season, permitting the harvester and the builder and everybody to pursue their business without interruption. The threshing is high completion, and those who have in a degree been overtaken will likely yet have opportunity to finish and contractors on large local buildings have hope that they will be permitted to complete outside work without weather difficulties. The little rain and some snow will create some advantages in lessening the fire hazard, which has been great of late, and the moisture will make possible the tilling of the land. Then it is just what the country needs for next year.

We are planning a great day at the Church of Christ on October 14th with the morning at 10:30 with the morning worship. Sermon subject, "The Why and Where of the Bible School." At 11:30, the Bible school session, at which we look for one hundred present. At 1:00, a bucket dinner will be held. Bring your baskets and enjoy the fellowship. At 3:00, there will be a session of short speeches, interspersed with music and singing, and followed by communion service. We have secured some local talent, for vocal and instrumental music. This is the rally meeting and all outside points will be represented by members from these places. It will be a program worth while and is open to the public. We want to see and hear from this work. It is no mean undertaking and citizens of this community owe it to these men of faith to recognize their efforts. We extend a hearty welcome to the public. At 8:00, an evangelistic meeting will be held at which the minister will speak on the subject, "Where Will You Spend Eternity?" Welcome is the big word—O. P. Burns, minister.

The October 1st issue of "The U.F.A." gives prominent publicity to Vulcan by carrying a large illustration of the Wheat Pool elevator at this point, with an inset photo of Mr. E. G. McLean, the local agent. Accompanying the cut was the following: "The Alberta Wheat Pool elevators, 160 in number, handled twenty-seven million bushels of wheat last year, an average of 170,000 bushels per elevator. Vulcan pool elevator had the largest handling, namely, 433,945 bushels. As can be imagined, the Pool agent, E. G. McLean, had a busy time of it. A second Pool elevator is being built at Vulcan to accommodate the large volume of Pool wheat. Last year a total of over 900,000 bushels of Pool wheat was delivered at Vulcan."

The Vulcan and District School Fair of 1928 has passed, and goes on record as a real success. Though perhaps not up to the greatest of the many successful events under these auspices, there were features in this fair that have never been excelled. The two-day plan, the first school fair experiment of the kind made in the province, proved to be just the thing and has the hearty approval of the department officials. Without extra loss of school time, it provides ample opportunity of viewing the exhibits and makes possible the pleasing entertainment such as that given by the Citizens Band and Miss Murdoch and Misses Peterson. The exhibits were short in some departments, particularly in flowers and vegetables, but a reason for this is well known, but a more careful selection in these classes displayed an exceptional quality. In threshed grains there were more entries than usual, and for a like reason, commanded the special commendation of the judges. School work and domestic science were well maintained. The program and spectacular numbers were a good average and in instances, such as the spelling match public speaking, school yell and parade, the showing exceeded that of previous years. Every school year was great, and the costumes school were more and the representations presented were better. Bright weather made it possible to hold the athletic games in the park, and in most of the contests there was a large field and close competition, even in the running race for lady teachers. The school fair is a great occasion for the boys and girls, and not without interest to parents and older folks, for they were there in hundreds, and all will continue their interest and peruse the list of the prize winners printed elsewhere in this issue of the paper.

LOCAL NEWS ITEMS

It is expected that the new Pool elevator, No. 2, will be in shape to handle grain about October 20th.

Daily papers of recent date carry record of the death of Mrs. Robert Browne, aged 77 years, who died at Winnipeg. Mrs. Charles Jones of Vulcan, is a daughter. A son, Mr. Whitla Browne, resides at Fernie.

Pussy willows in blossom were left at The Advocate office on Wednesday the day that it snowed and looked so much like winter. Mr. Dan Sims picked them up along the railroad track.

The Vulcan branch of the Alice Murdoch school of dancing is already developing to a considerable degree, and some sixteen to twenty pupils reported for tuition at the second class on Monday. Pupils may enter the classes at any time without disadvantage, and there is the prospect of a big school.

The coming again to Vulcan of the Georgian Singers and Players on October 22nd, is being anticipated by those who can enjoy a program of song and humor and music in splendid combination by artists of musical talent. The company of five will broadcast by radio from Lethbridge, a sacred concert on the Sunday previous to their appearance in Vulcan.

The appeal of the Red Cross in Vulcan will be presented at a public meeting by Mrs. Conquest, a lady of oratorical talent who is voluntarily in the service of this great organization. Arrangements are being made for this important event, and in the mean time it is suggested that citizens of town and country make calculations on a contribution in support of the humane operations of a society well known to everybody.

The gallery seats at the skating arena have during the week served for band concert and dance entertainment, school fair exercises, and boxing match, each time accommodating audiences far beyond the capacity of any other place available, and affording a community service of which account should be taken when the rink enterprise and later improvements are being considered. It is perhaps a mistake that the rink is not made to serve more general purposes, but this will in all probability be developed.

Supplies for Poppy Day, which is now just a month away, have been received in Vulcan. These flowers are made up by disabled veterans of the great war, and the sale of same will be in their behalf. The Women's Institute will sell the poppies, and Vulcan will again purchase generously.

Recent changes in the Bank of Commerce staff include the transfer of Mr. A. A. Bishop, who has been for two years assistant accountant. He goes into the Peace River country to open a new branch of the Bank of Commerce at Fairview, about sixty miles from the town of Peace River, and formerly known as Waterhole. Mr. Bishop is succeeded at Vulcan by Mr. R. E. Daw, who comes from Bervyn, in the Peace River country.

Vulcan and district will surely not be unrepresented in the next Dominion-wide oratory contest, the first of which this year elicited the support of the greatest of Canadian newspapers and created intense interest throughout the entire Dominion. To the Vulcan and District School Fair is the credit for the discovery of Master Neil Zahnd, winner of the gold medal in the public speaking contest for pupils of public schools. He is a pupil of Boyne school. Master Zahnd is a lad of few years, who displayed a style and talent that once surprised and commanded the plaudits of the people, and he sets an example to school-pupils in a line of effort that might to profit be better followed. The effort will be made to have Master Zahnd appear in public again in Vulcan, perhaps in connection with some school fair benefit entertainment.

We are planning a great day at the Church of Christ on October 14th with the morning at 10:30 with the morning worship. Sermon subject, "The Why and Where of the Bible School." At 11:30, the Bible school session, at which we look for one hundred present. At 1:00, a bucket dinner will be held. Bring your baskets and enjoy the fellowship. At 3:00, there will be a session of short speeches, interspersed with music and singing, and followed by communion service. We have secured some local talent, for vocal and instrumental music. Pool elevator construction at Pincher Station and Vulcan is progressing very rapidly and with the large crews of men employed will soon be accepting grain in the new houses at these points.—The U.F.A.

Mr. Geo. Terwilliger, who has been some time in the district looking after farming interests, has returned to his home at Hollywood. When in town he was a guest at the home of Mr. and Mrs. Chet. Wallace.

Excavation is being made on the premises of the Pyramid Motors. This is necessary to the installation of a new furnace and boiler, an addition to be made to the steam heating plant of this well known garage. Enterprises of the kind suggest the approach of winter and a calculation for the care of cars during the cold period.

There was a night fire alarm one time last week end. Someone had occasion to rise at about four in the morning, which is much earlier than is the custom generally in this city. Volumes of smoke issuing from the kitchen chimney were mistaken for a conflagration by the officer who looks after things while the citizenry sleeps, hence the ringing of the bell. The fire truck was turned out and residents reported for service but the mistake was soon discovered.

There is a report that application has been made to the Canadian Pacific Railway authorities for a site for another grain elevator at Vulcan. This granted would mean ten houses of the kind at this point, for now there are nine. This addition would increase the elevator storage capacity to within a short distance of one million bushels. The string is now about a half mile long, but in a prairie town there is always room for one more.

What are the hockey prospects? A great many people are asking what the chances are for hockey this winter.—Claresholm Press. Same here in Vulcan. What you do we do, is a practice sometimes followed in towns of a district, and now that there is quite a community of places with excellent rinks and hockey facilities, might it not be a good idea to have a conference of representatives of these places to determine the composition of a league or leagues and to set or limit the standard of club organization, with the object of making the competition even and interesting.

LOCAL NEWS ITEMS

Mrs. W. D. Munro has been the guest of Mrs. Norman Holmes at Vulcan during the week.—Claresholm Press.

Mr. M. F. Hill, of Vulcan, is on the Wheat Pool records as a recent signer for large acreage, named at 300 acres.

The Lethbridge paper records the registration of Mr. Del McQueen of Vulcan, at the Marquis, over the week end.

President Spooner, of the Vulcan Oils Limited, was in Vulcan on Tuesday, and a conference with local men interested in Vulcan, indicates a renewal of activities at the Vulcan oil well.

Mr. K. R. McLean, R.O., of Anderson & McLean, sight specialists, 208 Eighth Ave., West, Calgary, wishes to announce his semi-monthly visits to the King drug store, Vulcan, Saturday, October 13th, and Saturday, October 27th.

The Women's Institute and Ladies Aid are jointly interested in the collection and the shipment of a contribution of canned fruit to the Wood's Home. All persons desirous of making a gift of a jar of fruit are requested to leave same at the United Church parlor on Thursday, October 18, and they may secure an empty at the time.

Mrs. E. E. McIntosh is a Vulcan patient in a Calgary hospital that has recently been the subject of a successful surgical operation, and the prospects are that the result will be that so much desired by the patient and her many friends. Miss Mary Craig who has long been ill, was required to return again this week to hospital at Calgary for treatment necessary to her ultimate recovery, which is the hope of her many young and older friends.

Rev. Father McCormick has been transferred to the Catholic mission at Vulcan, and is succeeded at Coleman by Rev. Father Lehman, recently arrived from Ontario—Blairmore Enterprise. Father McCormick has been in Vulcan for a week or two and without ostentation has taken up residence and commenced the labor to which he has been assigned by his church. The information that follows him from places that know him best indicates that Father McCormick possesses the qualities that will in time make him well known and esteemed in Vulcan, where every man gets that welcome which he merits.

The first thing to be said about the boxing show on Saturday night is that it was great, perhaps the best ever presented in Vulcan. The attendance was certainly the largest and everybody highly pleased. The audience had a fine proportion of ladies, and they say a program that will incline them to future patronage. The review of the event must be limited, but the great success merits the statement that everything in every way was all right, a credit to the management and a satisfaction to fans. There was not the excuse for a complaint, and this show was the climax in establishing Vulcan as a provincial boxing centre. Messrs. Colin Melnes and Geo. Munro may take credit for this. The Pleasant boys were the first ones, and put the crowd in the right groove for a good time. Kid Alin of Portland and Young Balstad of Lomond opened right smartly for a four-round encounter, and kept the pace until the Lomond lad went out in the third. The Meyers twins from Blackie went four rounds in exhibition, and added to their popularity, and their purse by gifts from the delighted throng. Art Kubie of Lomond and Stewart Speechley of Chilliwack were the principles in the semi-windup, billed to go six rounds, but in the first minute of the first round Speechley went down for the count. Kid Lucas was introduced and officiated as referee in some of the preliminaries, and will go back to Calgary with a good word for Vulcan as a boxing town, having expressed surprise and appreciation of attendance and management and class of contest. Mel Towne and Frank Jackson figured in the feature bout. Both are popular in Vulcan, and this encounter made them more so. No two boys are available in the province to make a better match, both willing to mix it, which they certainly did during the entire route, with frequent changes of advantage, and every round was required to determine the winner. Claire Kimball, the referee, gave the decision to Cowie, and the fans approved. Experience gave Cowie the edge that he had, and Jackson performed in a manner that makes a demand on the part of the public for another match. Let it be said again that this is the finest fistic exhibition ever presented in Vulcan. Though the battle was strenuous to the limit, the ring courtesy and game play of the boys employed was such as to elicit applause and give them the place they merit as good sports.

Let Nothing Come Ahead of This

FIRST of all, when you are paid, pay yourself.

Unfailingly set aside a definite percentage of your earnings, deposit it in a savings account with us,—and leave it untouched!

Then plan to live comfortably on the balance of your earnings.

In this way you are bound to succeed—to enjoy life much more, to be independent when independence means most.

Be generous to yourself.

REACTION TO PERIL

The safety zone which surrounds every individual, depends on how long it takes him to think. In a test of 57 motor drivers, it was shown that the average time needed to see a danger signal and to realize its meaning, was a little over half a second. It takes half a second before the average driver begins to apply the brake. Some need more time. They do not register so quickly. No one can estimate how many lives have been lost because drivers are "slow thinkers"—not stupid or incompetent, but just too slow for this fast mechanical era. In the half second that elapses before action, even the average driver going 40 miles an hour is dangerous to those within 30 feet of him. If anything goes wrong he is helpless. He is almost sure to hit anything 25 feet in front of him. For 30 miles an hour, the safety distance is 45 feet. Even a man walking at the rate of four miles an hour, would be bound to fall into a man-hole suddenly opening 3 feet in front of him. He would be likely to escape if it were 6 feet ahead. It takes just so long to react to danger. As speed increases, the only hope for public safety is that the average man will be developed to react instantaneously to all about him.

HOW QUICKLY!

How quickly can a tree in the forest be converted into paper on which the printed news is sold on the street? A paper manufacturer in the Hartz district made the test which is recorded in "Der Papier Fabricant." Three flourishing trees with birds singing in the branches were cut down at 7.35 a.m., the trunks stripped of their bark, were immediately taken to his factory and in less than two hours transformed into pulp paper. At 9.30 a.m., the roll of paper was loaded on a motor van for delivery at a newspaper office two and a half miles away. At 11 o'clock copies of the newspaper printed on the paper which three hours and twenty-five minutes earlier was a live tree were on sale in the streets. And the next day it was as dead as yesterday's paper always is.

Efficiency was the keynote of the Freshies initiation in Edmonton this year. Before they were subjected to any supreme torture they were medically examined, and if declared unfit for surprises were excused. Four hours of hilarity of fly paper poulitices, green kalsomining and other devices brought the season's initiation to a close. And at the conclusion the subdued but uninjured victims were treated to buns and coffee.

THE FLEETING NEWS

The world is swamped in an avalanche of words. Hourly great presses grind out the momentary or lasting affairs of nations. Telegraph lines hum, pencils fly, machines whirl in the frantic effort to keep man abreast with the latest. And what's the reward? A casual glance at headlines and a tossing aside. How much is supplied and how little digested! Tucked away obscurely on inside pages may be the lifetime conclusions of some philosopher, the record of an invention that has taken years to perfect.

There is so much recorded in the daily press that deserves more than the passing interest. And persons turn on in the hope that some random shot may find lodgement. Yet, who has time in a day or a year to consume the overwhelming mass of words. Here and there may be found the discriminating reader who follows only his own particular interest. He at least fulfils some mental nourishment. But the vast majority of us are only befuddled in the headlines of the day.

We are like feasters at a banquet, yet loath to leave in case some new tantalizing flavor may be proffered. We taste, we discard. And the laborious effort of the multitude of mental chefs, is thrown into the discard from day to day—a complete loss.

AGAIN THE GOVERNMENT

People who clamor for "reforms" and get them seldom are grateful enough to vote for the government that brought such "reforms" about. Sir Wm. Hearst found that out after he met the demands of prohibitionists in Ontario. "They accepted the Bible but rejected the missionary," as D'Arcy McGee put it once. Hon. E. N. Rhodes did what the Liberals had been endeavoring to do unsuccessfully for forty years—he abolished the second chamber. Undoubtedly he lost many votes by it, for the Legislative Councilors had friends and influence. Undoubtedly, too, he gained no new friends by it. In the general elections on October 1st, he came nearly being defeated. His government survived by getting 23 seats out of 43, where in the last House he had all the seats except three. Many reasons are advanced for the slump but probably the chief cause is that since the war people generally are again the government.

THEY SERVE

The names of those great men, who in Henry Ford's opinion, have contributed most to the world's development are engraved in his research building at Dearborn. They include, Franklin, Fulton, Darwin, Wright Brothers, Edison, Burbank, Burroughs, Isaac Newton, Dunlop, Pasteur, Galileo and endless others. But the rejections of names are quite as significant as the selection. No soldier and no statesman amongst Ford's heroes. No swords nor cannons in his museum village.

Mr. Ford is quoted frequently as saying "history is the bunk" but his friends interpret this as meaning that, the sort of history which records military violence, or is prepared with a biased mind and for ulterior motive.

THE HUMAN BRIDGE

Henry Ford's "museum" village, destined to link the machine age with the various ages of man's progress, will be a wonderful record of the past when it is completed. At present his collection of antiques is housed at Dearborn, at the Ford Administration Building. The inscription over the entrance is "Mankind passes from the old to the new on a human bridge formed by those who labor in the three principal arts—agriculture, manufacture, transportation." He has endless collections of "period" furniture and utensils, which are a mute record of man's progress since first he tackled the wilderness of this continent. Though massed and jumbled at present, it is part of his design to house them fittingly in a museum village, for the benefit of the nation. The same motive prompted him to acquire "The Wayside Inn" of Longfellow, "Taliesin" and the Burroughs home-stead in the Catskills.

OLD STORY REVIVED

An old war story has been revived. During the war a German ship was seized and the men taken prisoner. Eventually, official notice was brought to Admiral Beattie that a British tar, had beaten up one of the prisoners of war. This was very serious and demanded instant investigation. The tar was brought before Admiral Beattie, who delved into the matter without result. At last, the sailor ventured an explanation: "The German said he didn't think much of King George, and I let that go. Then he said he had no use for our flag that it didn't mean anything. And that didn't bother me much. But he turned round and spit into the sea, and that made me mad, and I says, 'Say, who owns this sea anyway?' And then I hit him."

WITH THE AIRMEN IN THE HUDSON STRAITS

A. H. Warner, Former Vulcan Boy, Tells Story of Straits Expedition

Mr. A. H. Warner of the R.C.A.F. clothes mostly home made, are of returned last Friday to his home and family at High River, after more than a year's absence with the Hudson Straits expedition.

The work of the aviation stations in that far north country, was to gain an idea of the Straits currents and the action of the ice, throughout the year. This overhead survey was of a most satisfactory nature and will prove invaluable to the mariners of the Hudson Straits. Mr. Warner, naturally had nothing to report of the actual work of the R.C.A.F. in this connection, but his general impressions and experiences were of a most interesting nature. He has returned with some very fine snapshots of the native Eskimos, the animal life and scenic nature of the bleak Labrador coast.

There are 16 officers and men stationed at Wakeham Bay. Almost daily flights were taken, weather permitting, in the fall, spring and summer months, but in the winter once every two weeks was sufficient for general survey.

The last boat of the season for 1927 arrived at Wakeham on November 10, and the first spring boat got in, the first week of July. During early spring, the Hudson Bay Co. brought in its one-mail-a-year by dog team to Cape Wolstonholme, the north-easterly peak of Hudson Bay. And the air force made a detour in their regular flight to collect letters here for the post.

For fuel the station depended on the coal brought in by ship, as there is no timber nor scrub in that region. The food while good, was naturally mostly canned. Caribou was the big "Sunday treat," and was brought in by the Eskimos who travelled 150 miles to the hunting grounds. The winter was not so severe as it might be supposed—30.5 was the coldest registered at Wakeham Bay last winter. On the other hand the thermometer might lodge at 20 to 25 below without shifting for a month. There was a great deal of fog and wind, and the blizzards were of terrific intensity. For sport or recreation the air men depended much on skiing. They also took long trips by dog team, experimented with trapping, fished for trout by means of nets, and actually on one occasion netted a whale—by accident.

The Straits commence to freeze over in December. There is heavy ice in January and throughout the winter. They clear on both shores by April and May, with however, considerable ice in the centre. Later on, in June a current of heavy ice comes would appear to be a solid mass making navigation very dangerous. Viewed from shipboard this As seen from the air however, this June ice flow, does not appear to present very great hazard, as it does not by any means fill the Strait.

Mr. Warner in speaking of the Eskimos of the country described them as a most genial, likeable, happy natured people, and certainly his snapshots bear this out. There were about 200 living round Wakeham, purely in the native state. They picked up the occasional word of English but their lives while extremely happy were primitive. Naturally, there are no schools, but the parents teach their children by legend, and also instruct them in the simple alphabet letters of the language. Their

Bramwell Taylor, editor of the War Cry, died in Winnipeg on October 6.

ENTER GREENLAND

In all the strange history of Greenland the strangest thing seems about to happen. The ice of her frozen interior is about to become valuable just because it is ice, always frozen monotonously level. Aviators are realizing that across Greenland is the shortest and best route between many cities in America and many in Europe. Arctic explorers have told of how no spot is higher than another, and nothing exists but a dead level.

This desolation with not a snag you could stub your toe on for thousands of miles, is the world's most perfect landing field, lying just where it is needed, on the flying road to Europe. Eventually this waste may be dotted with air stations. And whether these come shortly or not, it will be a comfort to fliers to know that for a long stretch of their journey they can be sure of making a safe landing. While the coasts of Greenland are subject to strong winds, the interior is unusually calm. The great drawback to its use as a landing field is that it has no landmarks. On the other hand perfect navigation or a radio direction finder will soon control this disability. And perhaps one of the greatest points in its favor, is that the inland regions are exceptionally clear of fogs, the deadliest enemy of fliers.

IODINE'S NEW USES

Goitre in sheep, hairlessness in pigs, joint-illness in colts, can all be prevented by the use of iodine. "There is no substitute for iodine" says Dr. Stevenson, provincial zoologist in Ontario. "It must be present in the food. What you lose in one dead or runt lamb would pay for all iodine needed by your flock for ten years. Not only does it prevent goitre in sheep, but it tones up the general health of the animal, giving larger lamb crops, greater gains in wool and sheep. One half-ounce per sheep per year of Potassium Iodine is recommended. Dissolve four ounces potassium iodine in a pint of water. Sprinkle over 100 lbs. of salt and mix well. Let sheep and lambs help themselves.

The Pincher Creek Board of Trade is co-operating with the Cranbrook officials of the same body, to provide road signs with mileage in the Cranbrook-Pincher trail.

EXPERIMENT IN FARMING

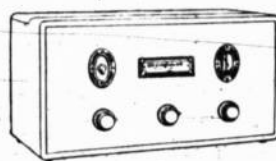

An interesting experiment was conducted on a farm near Claresholm, by the officials of the school of agriculture. Two 5-acre plots were accurately measured off—one was treated by a phosphate fertilized produced as a by-product from the smelter at Trail, B.C. The commercial cost of the amount used was ninety cents per acre. When these two plots were threshed last week, says the Claresholm paper, the treated five acres yielded 54 bushels per acre and the untreated five acres yielded 46 bushels per acre. The cultivation on the two plots was the same, as they were a part of Mr. Salmon's summerfallow field, so the difference in the results could be directly traced to the phosphate. Observing the plots during the growing season, Mr. Salmon tells us that in the dry periods there was a decided difference in the appearance of the two plots. In fact, the preparation is specially prepared as an aid to semi-arid lands, and should materially aid in the solution of grain-raising in Alberta's dry areas.

BAD PRAIRIE FIRE

The disastrous prairie fire which waged last week round the districts of Foremost and Bow Island, worked terrific damage in a short time and called forth many deeds of heroism and endurance. The fire was started on the Saunders' farm near Purple Springs. A spark in the strawstack was the beginning and in a moment everything was in conflagration. The police of Bow Island was notified and volunteers instantly mustered. Over 2000 men fought the flames which tore along at 40 miles an hour, sweeping 50,000 acres. It is estimated that 100,000 acres of binned grain were lost, as well as much in stock. An area 22 miles long and from two to ten miles in width was laid waste. Farm houses were saved by fire breaks, and there was little loss to live stock. The automobiles and trucks were of immense value in carrying men to the firing line. Without them losses would have been infinitely greater.

The Red Cross cordially invites the public to inspect their new unit at the University Hospital in Edmonton and see what service it is they are asked to support during the present campaign.

Radio Receptionas you like it from a Westinghouse

[Compact Model - \$82.50
Console Model - \$167.00]

MUSIC—symphony orchestras—famous bands—world-renowned singers—always the full-toned rich productions—exactly as you would hear them in the studio.

One touch of the single dial control gives you the choice of the world's best music—"if it's in the air, a WESTINGHOUSE will get it."

You will be amazed at the perfect performance of the console model and its low cost of operation.

THE WEEKLY EXCHANGES

Innisfail Province
 Parents, ratepayers, and teachers are urged to meet October 12, to discuss formation of a Parent-Teachers' Association.

The town is to be surveyed by Messrs. Hadden & Miles, engineers, for the purpose of installing water and sewer.

Macleod News

In ten days travelling of the Blue Trail between Macleod and Cardston will be completed.

George Cahoon, 13 miles south of Macleod threshed a field on breaking which yielded 69 bushels to the acre and No. 1. A. E. Skelding ran 62 bushels and Chris. Hilliard had 67 bushels to the acre.

Gleichen Call

Aren't men funny? A Gleichen man who hadn't kissed his wife for a year and a half, whipped another man who did.

Mrs. Crowfoot, wife of the celebrated Indian Chief Crowfoot, died on the Blackfoot reserve last Friday.

Three young Scotch harvesters were in straits before harvest began, and who were assisted by Gleichen townspeople, now write their appreciation of the timely help, and state that they are happily at work at Nordegg.

Otokots Review

The town council is open to offers from individuals to operate the skating rink for the season 1928-29.

The homes of R. Knowles and M. MacGougan were robbed Sunday night. The houses which were unlocked, were entered presumably at night when the families were asleep upstairs. No damage of any kind was done, but \$25 was taken from Miss Knowles' purse and \$10 from Miss MacGougan. A pistol, sweater, socks, spy glasses, camera and other articles totalling over \$100 were taken from MacGougan's.

Clareholm Local Press

Billy Campbell, a nine year old boy of Clareholm, was killed last week when he opened the door of the truck driven by his father, and fell out under the wheels and was instantly killed.

Mr. W. J. Harper has done a lot of travelling this summer in the High River, Clareholm and Macleod districts in connection with the boys' and girls' pig clubs. The annual provincial judging competitions will be held in Calgary early in November and the pigs will be shipped for grading and sale at the same time. Mr. Harper is coaching teams at High River and Macleod to compete at Calgary, and one may yet be entered from Clareholm. The extension work which Mr. Harper has undertaken, along with his regular duties as farm manager, keep him busy much beyond the usual ten-hour day.

COMING TO VULCAN

The Georgian Singers and Players have contracted for an engagement in Vulcan on Monday, October 22nd. Press reports from British Columbia and Southern Alberta all agree that this company of five artists is presenting an unusually high class entertainment, which is meeting with a number of requests for return engagements. This is the second annual tour of the organization, and countless friends made last year are expressing the judgment that "the programme and personnel are better than last year."

Mr. John F. Edmondson, director, has been engaged in concert work for more than twenty years. He has a rich baritone voice, and is also a natural born comedian, appealing to the humor of his audience one minute and calling into play all their musical appreciation the next.

Isobel Jolliffe's soprano voice has justly earned her the title of "Scottish Nightingale," and her rendition of a number of folk songs carries her hearers back to the days of childhood and mother. As a graduate of the famous Metropolitan Grand Opera Singer, Giuseppe Inzerillo, she was predicted to go far in concert work. She was in the group last year.

Gloria Wilton, one of the most brilliant pupils of that eminent pianist, Jan Chermiavsky, is one of the most sought after pianists of the coast city. She also has a well trained contralto voice which is used to advantage in a number of ensemble selections.

William Kennedy, another graduate pupil of Giuseppe Inzerillo, is the basso profundo of the group. His ability to sway his audiences, either in solo or group singing, has been amply proven by the many letters of praise received following his singing over CNRV at Vancouver.

Horace Chapman, the silver-voiced lyric tenor, also had the privilege of completing his musical training under Giuseppe Inzerillo, who predicts that he will reach the pinnacles of the musical world. While the youngest of the group, his work stands out pleasingly, whether in solo or ensemble.

The male members of the group form a trio that is difficult to excel outside the large music centres. Their work over CNRV has brought forth praise from numerous American artists.

The programme is well varied so that there is not a dull moment. A change from the sublime to the ridiculous is provided when the entire company put on a short one-act comedy skit. The action is fast, the fun furious, but withal clean and enjoyable.

Three hunters from Hanna, captured a fine moose, just twenty-five miles west of Olds.

CHILDRENS HOSPITAL

One of the "show places" of the capital city of Alberta, is undoubtedly the Red Cross unit at the University Hospital, where the sick and crippled children of the province are receiving the best surgical skill and nursing care.

First to attract attention is the fine spacious sun-porch with its huge glass windows and doorways to admit all the strong Alberta sunshine that is possible. Rows upon rows of little cots, many with the names of donors, are arranged within and the visitor stands amazed at the beauty and completeness of these up-to-date wards. Flowers are everywhere with their message of cheer, and goodwill. Radio receiving sets, loud speakers, etc., tell of the kindly hearts that are ever planning for the comfort of the children.

The visitor pauses at the entrance while a student-nurse comes forward with a white gown which must be worn while visiting the patients. The little nursery wards are right at the door, and through the glass we see tiny babies with little pink toes poking out from their plaster casts. The diminutive cots invariably draw forth admiration from women visitors, to whom the sight of a new baby with crooked limbs is indeed a tragedy.

The young patients in the boys' and girls' wards come from the northern and central part of the province, and are found to be of many nationalities. An Indian girl and a negro lad are amongst the many types seen here, each and all with a smile for the visitor and a word of hope that they will soon be well enough to get out of bed and walk. The cures take a long and often tedious time, but the hospital days are filled with many interesting tasks, such as weaving on a little bedside loom articles of use and beauty, or making little boutonnieres of beads of many colours.

BRYAN'S BEST STORY

A man said to one of his friends: "I am drinking too much, and I can't help it. My friends keep asking me and first thing I know I get too much." His friend said: "I will tell you how to prevent it. After this, when you get all the whiskey you want, and anybody asks you to have more, don't call for it, call for sarsaparilla." "But" the man answered "that's just the trouble." When I get all the whiskey I want, I can't say sarsaparilla."

WHAT CANADIANS TALK ABOUT

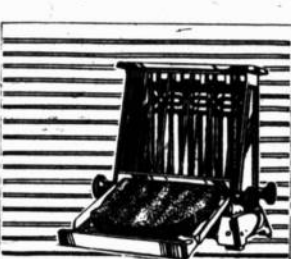

R. J. Deachman in one of his syndicated articles, has divided up the sum total of talk in Canada from January to June 1928. Subjects discussed and percentage. Autos and air planes 52 per cent—this includes parts, tires, accessories, also condition of roads—recent flights and future air prospects. Personal gossip, 26 per cent—mothers about their children, tonsil operations, maids, etc.—also men talking about women's clothes. Sport, 7 per cent—a big subject with limited interest. Stock market, 6.5 per cent—intense interest in a narrow group. Politics 1.09 per cent—larger in election years. Religion, .03 per cent. Miscellaneous, 5.98 per cent. Mr. Deachman acknowledges that these figures are general and that varying localities may feel that their pet subjects have not been given due prominence. He even goes so far as to admit that he has taken no observations on the conversational themes of the threshing gangs of the western harvest fields.

In the personal gossip, the 26 per cent. seems fair. True much of this is the cute ways of children and tonsil talk. But we doubt if men's talk runs much to women's clothes. There is so little to talk about. On the other hand, men do talk about something. We have all seen them—down town that is. But Mr. Deachman shrouds their conversational gems in mystery—women's clothes as they are today, can't cover everything.

We would cut out stock exchange and put it to the credit of weather. A man, observing life from the Ottawa viewpoint, where the weather doesn't matter if the exchequer is holding out, could not be expected to know that in the wide open spaces, weather controls about 100 per cent. of our waking thoughts and a very fat share of our speech.

Wife (at top of stairs): Explain yourself, where have you been till this hour? Husband: My dear—er-stop me if you've heard this one." It was his first sermon, and the young curate was anxious to present a favorable appearance. Smoothing his hair he said to the old verger, "Could you get me a glass? A small one will do." The verger hurried away and soon returned, holding something concealed under his coat. "I know what nervousness is, sir," he said; "here's a whole bottle."

EDITORIAL

In the past many of our customers have become mighty good and congenial friends. We like to think of so many of them as friends rather than customers. Business may be hard boiled but we don't think so. For us if you would take friendship away from business and there wouldn't be much left.

If you have a tough problem in the implement line herd it in here.

LEADERSHIP

It is funny how the automobile that is ten years ahead of its time always comes out the next year with a greatly improved model.

A boss is a man who arrives at the office early when you are late and late when you are early.

Almost every man believes in heredity until he sees his son acting like an idiot.

Auto Tourist: "I clearly had the right of way when this man ran into me, and yet you say I was to blame."

Local Cop: "You certainly was."

Autoist: "Why?"

Local Cop: "Because his father is mayor, his brother is chief of police and I go with his sister."

This is an age for slogans and mottoes but the best slogan man has nothing without something substantial to back it up.

NO'S THE ANSWER
Mother: "If you want to go to Jimmie's house why didn't you come and ask me?"

Sammie: "Cause I wanted to go."

Too many people are inclined to "let George do it" when it's a case of getting behind some civic improvement.

HONESTY

A concern in St. Louis sends neckties on approval to people who have not ordered them, and actually makes money. Peculiar merchandising, but at least it proves what we have always believed—that most people are honest.

It took the garter more than nineteen centuries to win its place in the sun.

Thank goodness, that's over.

R. J. MONDS

Farm Implements
VULCAN

Good Equipment Makes a Good Farmer Better.

FLOWERING BULBS

The earliest spring flowers are bulbs and should be grown in gardens for this reason as well as for their beauty. Sandy well drained soil suits them best, but they will grow on heavier soils. The ground should be well and deeply dug, and old rotted manure mixed with it. If this is not available, pulverized sheep manure or bone meal can be mixed in the soil or used as a top dressing. The bulbs should be planted in late September or October, from four to six inches deep for narcissus and tulips. A mulch of well rotted manure should be put on the beds after the ground is frozen, particularly in districts where the snowfall is light and thaws frequent. There are many kinds of spring flowering bulbs. A few of the best are mentioned here:

Chionodoxa, or Glory of the Snow is one of the earliest flowers to bloom. The flowers are blue with white streaks towards the throat. The bulbs should be planted two or three inches apart and three inches deep. The narcissus family is one of the most welcome signs of spring and includes beside the yellow trumpet variety commonly called daffodils, many kinds of flowers in various shades of yellow and white. Some of the best varieties are: Emperor, Mme. Plémp, Tutea, John Ruskin, La Merveille, low Perfection, Cottage Gesneriana, Phaeasant Eye, Klandoyke, Elvira, Sir Watkin, Conspicuous, Seagull, Van Sion.

Scilla, known as squills are hardy bulbs which grow well under trees and in grass as well as in the open border. Of these S. sibirica, the Siberian squill, is the earliest to bloom and grows about six inches high and has bell-like flowers, of rich blue. They spread rapidly by division of the bulbs and also by seeds which are freely produced.

S. campanulata the Spanish squill and S. nutans the Bluebell or Wild Hyacinth of English Woodlands bloom later.

Tulips are the most popular of spring flowering bulbs. There are a number of varieties which bloom at different seasons and have also a large color range. Early flowering varieties of tulips are: Keizerskroon, Couleur de Cardinal, Vermilion brilliant, Cottage Maid, Goldfinch, Lady Boreel.

The following are some late flowering tulips: Breeder Louis XIV, Yellow Moonlight, Picotee, Darwin Bartigon, Clara Butt, Pride of Haarlem, King Harold, La Hulpe noire, Rev. H. Ewbank.

The Arrowwood Community Hospital is under construction and work is advancing rapidly on it now. The R. B. McLean elevator is now constructed and the first load of grain taken in to it. R. B. Hale is the local agent. There are five of the Arrowwood High School and C.G.I.T. Group of last year attending schools in Calgary this year. They are Misses Isabelle Shearer, Opal Vancil, Hazel Norton, Verna Ingarham and Elma Elkins. A. G. Salter, three miles east of Arrowwood reports one of the largest wheat yields of the year. He claims 6,600 bushels from 110 acres of summer fallow. Roscoe Shatto, 12 miles south of town reports a 60 bushel yield on new breaking of Marquis wheat. It is estimated that there is already a million bushels of wheat threshed in this district. There are thousands of bushels in piles on the ground waiting cars to ship it out. The elevators have been plugged at Arrowwood for ten days. There has been several cars of number one northern wheat shipped from here. There have been several fires around the district recently. The stubble is so long and thick. The trucks and combines and threshing rigs have made the risk very great. A quarter section of Milt Henry, seven miles west of Arrowwood caught fire in some mysterious manner recently and completely burned everything making the ground as black as it was summer-fallow. The blaze started in the centre of the field and no one was near it when it was first seen. Within a few minutes there were about fifty surrounding farmers and threshing crews there with scoop shovels, sacks and tractors and plows. They were able to hold the fire to the one field. If it had crossed the road several sections of wheat would have been wiped out. This is the second fire Mr. Henry has had in the past six months. He lost a bin of wheat last Spring from fire and has in the past six months. He lost a bin of wheat last Spring from fire and has never been able to find out how it started. Some advance the theory that matches were dropped while stooking and mice had ignited them. Others think that perhaps a piece of glass was focussed in such a way as to magnify enough to cause the sun to start the fire. The Buffalo Hills Ranch Co. had one of their new trucks burned from fire lighting stubble which had gotten around the exhaust. It was a total loss.

Up in the Grande Prairie they grow squash measuring 3 feet 6 inches round and weighing 31½ pounds.

Canadians still use great quantities of wood for fuel. One foot out of every three cut, goes for fuel.

It is said that the British, French, German and Russian governments are experimenting with airplanes that will be both silent and invisible. In time of war these machines will be able to wipe out great cities in a few hours with poison gas. The massacre of an army could be accomplished in one or two days. These scientific preparations will have one of two effects. They are either going to lead up to a conflict so terrible that half the world will be wiped out. Or they are going to make war prospects so terrible that humanity will revolt at the very idea. Will there be a general rebellion of the human race against international slaughter.

ENSIGN NEWS

We are sorry to hear that Mr. and Mrs. W. Tibbets are leaving our community this week for Washington, D. C., where they will make their future home. They will be greatly missed, but we all wish them great success in their new undertaking.

A very interesting sermon was preached on Sunday afternoon, October 7th at Ensign school by the Rev. J. J. Farquhar, the subject being chosen on "Immortality." You are all invited to attend these services every Sunday afternoon at 3 p.m. and Sunday School conducted by Mrs. A. Smith at 2:30 p.m.

The Ladies' Aid met at the home of Mrs. H. Parker, Wednesday afternoon, October 3rd and fifteen members were present. The president, Mrs. E. Harris opened the meeting by all singing the hymn "I am Thine O Lord" and a bible reading and prayer followed. The roll call being answered with household hints and recipes. Readings by Mrs. L. Jackson and Mrs. E. Hanson. The subject on flowers for the sick was discussed as the Aid had been very generous in their contribution to the sick and had done wonderful results. Arrangements were made and different committees chosen for the forthcoming chicken supper which will take place November 9th in the school. Refreshments were supplied by Miss Elizabeth Williams and served by Mrs. L. Jackson, Mrs. H. Parker and Miss E. Brims. The next meeting to be held at the home of Miss Isabel Williams.

The school children spent a wonderful day at the school fair at Vulcan, Friday and came off in high honors by carrying off the shield and first prize in the chorus singing competition. We feel proud of our young singers and much praise is given to their teacher, Miss V. McCannell who have their voices so well trained. The following is a list of the prize winners in their exhibits: Writing—2nd, Ila Elston, 5th G. Girard, 6th Doris Ruark. Composition—2nd Gertrude Girard. Paper Furniture—1st Rita Borque, 2nd Remi Couture. Spice Cakes—1st Leonard Southgate, 4th Rita Borque, 7th Billy Harris. Doughnuts—4th Doris Ruark. Knitted Scarf—1st Rita Borque. Doll's Cap and Coat—1st Gertrude Girard. Lunch Set—1st Aline Gerard. Dress—1st Gertrude Gerard. Child's Dress—3rd Aline Gerard. Mangels—1st Seed Onions—2nd, Cabbage—6th, all grown and won by Stedman Parker. Harris Matlock won five dollars in running race and jumping. Stedman Parker took 2nd prize in the running.

The Women's Institute met at the home of Mrs. E. A. Elston, Tuesday afternoon, October 9th. There were twenty-one ladies present. The president, Mrs. J. Ferguson, opened the meeting by all singing the "Maple Leaf," followed by the creed. The roll call being answered by household hints and recipes. The secretary-treasurer, Mrs. A. M. Meyers read a few interesting letters also appeals from different organizations and societies. Suggestions were given to meet these appeals and quite a few were carried and will be brought forward at the next meeting. Mrs. J. Ferguson gave an interesting reading on the subject of "Health" which was well read and enjoyed. A flower committee was chosen and given to the directors, being Mrs. E. Harris, Mrs. P. Borque and Mrs. L. Chapman. Refreshments were served by Mrs. E. Southgate, Mrs. A. Smith and Mrs. E. Elston. The next meeting to be held at the home of Mrs. J. Ferguson, November 6th.

ITEMS OF INTEREST

A. H. Tovell, manager of the Hail Insurance Board of Alberta, stated that although hail losses for 1928 have not been quite as heavy as in 1927, yet they have been almost double that of a normal year. In 1927 the loss was 17 per cent. of the risk. This year the loss was a trifle more than 13 per cent. There were 1,328,412 acres insured, with a total risk of \$12,167,000. On this risk claims amounting to \$1,550,000 were paid. There were 8,481 applicants for insurance and of these 3,060 made claims for damages. The storm of August 11, set a new record. It hit the hail swept across the province, hitting township 34, in every range. Two storms on this day created 400 miles of havoc.

REID HILL NEWS

The Reid Hill Women's Institute is promoting a "kitchen shower" for the equipment of the suggested department of the new community hall. The gift of utensils or the wherewith to purchase such will be acceptable. The event will take place at the home of Mrs. Jack McKay, on Thursday, October 18th, when tea will be served at a small charge.

KIRKCALDY NEWS

The item reading Mrs. Williamson and grandson, should have read Miss Williamson and nephew.

Mrs. Pete Patterson and daughter Margaret of Champion, spent Thursday with Mrs. Grant Mallory.

Miss Gertrude Roebuck who is attending school in Calgary spent the week end at the home of her parents.

The Misses Zella, Marguerite and Winnifred Todd, also Miss Kathleen Colwell, motored to Pincher Creek on Sunday.

Master Howard Coulin of Calgary spent the week end at the home of Mr. and Mrs. A. Roebuck.

Mr. and Mrs. Joseph Myers, Miss McCall and Mr. W. H. Baldwin motored to Staveland on Sunday, spending the day with Mr. and Mrs. George Seomand.

Mr. and Mrs. James M. Roebuck motored to Lethbridge on Sunday.

Mr. Charlie Tuttle and daughter, Winona spent the week end in Calgary.

Mr. and Mrs. Porter from Calgary spent Sunday with Mr. and Mrs. Fox.

Mr. and Mrs. John Fox are spending a few days in Calgary this week.

Dr. and Mrs. A. R. Hagerman, of Toronto, who have been visiting at the home of J. D. Hagerman and R. A. Clements, left for their home on Wednesday last.

ITEMS OF INTEREST

Another farm in the Arrowwood district has been sold to an outside buyer. Herbert Whitehead of Make Peace, Alberta, has purchased the farm of William Jones of near Arrowwood, containing 480 acres. The price realized by Mr. Jones was \$26,400, being \$55 per acre. Mr. Whitehead will move into the district as soon as possible. The sale was made through Lyle Brothers Land Office at Arrowwood.

Jack Miner's "feed bill" for 1927 spring and fall was \$5,800. This is of course, only for feed for his refugee birds and does not include the expense of building nets to catch the birds to study their route of migration and for aluminum for tags. The Dominion Government allows him a grant of \$750, the Ontario Government about \$400, and he raises the balance of his voluntary feed bill by lectures.

Rum runners do not flit hither and yon absolutely unimpeded, in spite of what the public thinks. The U. S. patrol made public at Great Falls, the seizures which had been made along the border, in the last few days of September. They include about 1700 quarts of Canadian beer and 120 quarts of whiskey in addition to wines, gin, etc. A number of cars were also seized in connection. The liquor has been used to stimulate the sewer system of Montana.

ITEMS OF INTEREST

"What's a living wage?" is the heading of a newspaper article. Well, generally speaking it is the wage that's existing.

Crows are becoming a serious menace in the unthatched fields toward the foothills. They light in flocks, till the fields are a black mass. The ducks too, are benefitting greatly.

A woman has left Washington in a motor car looking for a man who will make a good husband. Seems silly, but at that she might run into one.

Premier King does not think the Conservatives have a snowball's chance in the next election, else he would not have had that picture taken in his bathing costume.

We don't know where they draw the line. All we know about it is that they would not allow Harry K. Thaw into England, while they allowed Aimee Semple McPherson. But there's a vast difference between the two, their achievements and accomplishments, and no doubt the authorities were right in both cases.

The Willis Knight car stolen from the streets of Blackie on Saturday, September the 29th, has been found at Vulcan. The thief ran it between two elevators there and disappeared. No trace of the thief so far has been discovered. It is now believed the car thieves were not the same party that entered the Blackie Hardware Store and Segal's General Store and helped themselves to over two hundred dollars in cash. The provincial police have not yet discovered any clue that would enable them to locate the guilty parties.

Another case of infantile paralysis has developed in the Blackie district. Miss Dorothy Burns was taken to Calgary Hospital on Sunday. The doctors after careful diagnosis, pronounced it infantile paralysis. She has returned home and is making rapid recovery. The disease caused paralysis of one shoulder and the upper part of the arm. If the recovery continues, Dorothy will be around again in about ten days. Peggy Roebuck, the other victim of infantile paralysis, is around again and is almost normal. Her ailment took the form of throat paralysis.

The undertakers and embalmers of Ontario having been enacted into a close profession, the Board of Discipline has started operations by finding a member of the profession guilty of "uncourtesy." One of the charges against him was "discourtesy," so the finding was more or less of a compromise. He was ordered to pay back ten dollars of the amount he had collected from the "client," or whatever, the name is now for the paying representative of the corpse. We started out this article with the intention of making a few comments and now we do not know what to say.

A man dying at eighty left a will thanking everyone he knew for a happy life, and his wife or forty years of joy. A man of that sort is just the sort of man to have that sort of life and that sort of wife. There are many like him but they did not talk about it or write about it, or if they did the sound was lost in the louder whines of the squealer and the howls of the growler. They are here, just the same, living and loving, happy and making others happy, grateful to be alive, to be happily mated, and to have so many friends.

ESTRAY

There is a relationship between static and storms. There are storms, it is true, that are accompanied by little or no static. There are other storms, accompanied by static, which are nevertheless difficult to locate because the static appears to come from no definite direction. But as a rule static accompanies a storm and gives in advance of the arrival of the storm definite indications of the direction of approach.

Would You Like to Get Away from Ashes, Smoke, Soot and Dirt this Winter?
If so, burn—
PETROLEUM COKE

It goes further than the best soft coal and, therefore, cuts the cost of heating your home 35 to 50 per cent. It is crude oil with the gasoline removed. It contains absolutely no ash or other waste. It does not slack in your bin like coal. It is clean—no soot; no smoke; no dirt. It is easy to fire and easy to learn how to fire. It is burned instead of coal or wood in any stove or furnace. It is large, lumpy, and bright. It saves you money with less work, worry and attention in firing. Do not confuse Petroleum Coke with Coal Coke which contains ash. Resolve to get away from the daily ash pan this winter. Burn something that will turn coal-drudgery into a pleasant experience. Ask for Petroleum Coke. We have it.
